SUMMARY

A motivated computer programming student with hands-on experience developing web applications using HTML, CSS, JavaScript, and Tailwind CSS, and experience building responsive and user-friendly interfaces. Proficient in React to create interactive user interfaces and Redux to manage state. Demonstrated abilities through personal projects. Strong problem-solving abilities and commitment to high-quality development. Eager to leverage my skills and knowledge in a professional environment and contribute to impactful projects.

EXPERIENCE

Web Developer   07/2024 - 07/2024
E-Commerce Web Application Using React and Redux ↗

Developed an e-commerce web application using React and Redux. Managed application state with Redux for a seamless user experience, integrated APIs for real-time product data and transaction processing, and created a responsive interface for easy navigation and shopping.

Web Developer   07/2024 - 08/2024
Development of an Interactive Personal Website Using React and CSS ↗

I developed a personal website to showcase my portfolio using React, focusing on building a dynamic and visually appealing user interface with modern web development techniques. The website was entirely styled with traditional CSS to ensure a clean, responsive design across various devices. It features easy navigation and a smooth user experience, displaying detailed information about myself and my past projects, along with direct links to my social media profiles. The site is hosted on Netlify, ensuring high performance and fast load times.

Web Developer   04/2024 - 04/2024
Development of a Weather App Using JavaScript and APIs ↗

I developed a Weather App using JavaScript, enabling users to receive real-time weather updates for any geographic location. I utilized APIs to fetch data from global weather sources and displayed the information in a clear and visually appealing manner using JavaScript and CSS. I focused on enhancing the user experience by designing a user-friendly, responsive interface that works seamlessly across various devices. The app features multiple location searches, daily weather updates, and future forecasts.

Web Developer   03/2024 - 03/2024
Development of a QR Code Generator Using JavaScript ↗

Created a QR Code Generator using JavaScript that allows users to generate custom QR codes for various types of data. The application features a user-friendly interface where users can enter data and quickly produce QR codes, which can be downloaded for digital or print use.

EDUCATION

computer programming   09/2022 - 09/2024
Kahramanmaraş Sütçü İmam Üniversitesi - Associate Degree in Computer Programming

Achieved High Academic Performance:

Maintained a high GPA and received recognition for outstanding performance in computer programming courses.

SKILLS

Problem solving	Advanced	Tailwind CSS	Intermediate
Github	Advanced	JavaScript	Advanced
Redux	Intermediate	CSS	Advanced
React.js	Advanced	HTML	Expert
